Monday

Push

Chest, shoulders, triceps. Heavy presses, then pump.

Session map

Order	Exercise
Warm-up	8-10 min
1	Incline press
2	Flat bench
3	Shoulder press
4A+4B	Low-chest fly + Lateral raise
5A+5B	Pushdown + Crunch
6	Overhead extension
Cardio	Incline walk 12 min
Cooldown	5 min stretches

About 80-90 min in total. You burn roughly **400-540 kcal** today.

Food today	
Calories	2,150 kcal
Protein	240 g
Carbs	151 g

Food today	
Fat	65 g

Meal 60-90 min before. Total War about 45 min before (by 7 pm, or half a scoop if you sleep badly). No Lipo 6 on top. Shake right after training.

Weights

Weights are starting guesses from your logs. If the first working set leaves 3+ reps spare, go up one plate. Write down what you actually used.

Warm-up

8-10 minutes. Do it every time, even when you are short on time.

Easy bike or treadmill

3 MIN

Light pace, just get warm.
Alternative: Skipping, easy, 2 min

Watch demo >

Neck mobility

5 EACH WAY

Chin tucks, ear-to-shoulder tilts, look left and right. Slow. No full head circles: they grind the neck joints.

Watch demo >

Arm circles

10 EACH WAY

Small to big, forward then back.

Watch demo >

Cat-cow
8 REPS

On hands and knees: round your back up, then let it sag. Slow, breathe with it.

Watch demo >

Shoulder prep (band)

Shoulder rule: no band 'dislocates' (passing a band over your head and behind). That end position is how your shoulder came out.

Band pull-apart
15 REPS

Arms straight at chest height, pull the band to your chest, squeeze the shoulder blades.
If no band: Cable reverse fly, very light

Watch demo >

Band external rotation
12 EACH ARM

Elbow pinned to your side, rotate the forearm out slowly. This is your shoulder's stabiliser work.
If no band: Cable external rotation, very light

Watch demo >

Band face pull
15 REPS

Pull to eye level, thumbs back.
If no band: Cable face pull, light

Watch demo >

Wall scap push-up
10 REPS

Arms straight on a wall, only the shoulder blades move together and apart.
Alternative: Scap push-up on knees

Watch demo >

Main workout

1 Smith incline press

UPPER CHEST, FRONT DELTS

Set	Reps	Weight
Set 1	10	10 kg/side (22 lb/side)
Set 2	8	12.5 kg/side (27.6 lb/side)
Top set	6-8, 1 short	15 kg/side (33 lb/side)
Back-off	10-12	10 kg/side (22 lb/side)

Rest: 2-3 min. | No warm-up set

HOW

- Bench about 30 degrees
- Bar to upper chest, elbows 45 degrees
- Stop 1 rep short on the top set

WHY THIS EXERCISE, WHY HERE

Upper chest is your top chest priority, so it goes first on Push day while you're strongest. The heavy top set is the main growth signal.

If busy: 1) Incline chest press machine 2) Incline dumbbell press

ADVANCED (WEEKS 3-4)

Back-off set: lower for 3 seconds on every rep.

Block B swap (week 6+): Incline dumbbell press

First exercise: one ramp set at 50%.

Watch demo >

2 Smith flat bench press

CHEST, TRICEPS

Set	Reps	Weight
Set 1	10	15 kg/side (33 lb/side)
Top set	6-8, 1 short	17.5 kg/side (39 lb/side)
Back-off	12	12.5 kg/side (27.6 lb/side)

Rest: 2-3 min. | No warm-up set

HOW

- Shoulder blades pinched
- Lower to mid-chest in 2 sec

WHY THIS EXERCISE, WHY HERE

Loads the whole chest heavy. It comes second so incline gets your freshest effort.

If busy: 1) Dumbbell flat press 2) Chest press machine

ADVANCED (WEEKS 3-4)

None. Barbell-style lifts stay clean.

Block B swap (week 6+): Barbell bench press (if shoulder feels 100%)

Watch demo >

3 Machine shoulder press

DELTS, TRICEPS

Set	Reps	Weight
Set 1	10	45 lb (20.4 kg)
Top set	6-8, failure	55 lb (24.9 kg)
Back-off	12	40 lb (18.1 kg)

Rest: 2 min. | No warm-up set

HOW

- Handles start at ear height
- Don't lock out hard
- Stop if the joint clunks

WHY THIS EXERCISE, WHY HERE

Shoulder mass for width. Machine path keeps your shoulder safe at failure. Third because chest pressing already warmed the delts.

If busy: 1) Landmine press 2) Smith seated press, light

ADVANCED (WEEKS 3-4)

Back-off set: rest-pause, 2 rounds.

Block B swap (week 6+): Seated dumbbell press, light

Watch demo >

4A High-to-low cable fly

LOWER + MIDDLE CHEST | Pair 1 (with 4B)

Set	Reps	Weight
Set 1	12-15	10 kg (22 lb) per side
Set 2	12-15	12.5 kg (27.6 lb) per side
Set 3	12-15, failure	12.5 kg (27.6 lb) per side

Rest: 45 sec, then 4B. | No warm-up set

HOW

- Pulleys high, step forward, slight lean
- Sweep hands down and together to belly-button height
- Squeeze 1 sec, control back up

WHY THIS EXERCISE, WHY HERE

Lower chest is the bottom edge that makes the chest look full and square in a T-shirt. The incline press hit the upper fibres and the flat bench the middle; this finishes the lower ones. Paired with laterals because they use different muscles.

If busy: 1) Pec deck, hands set low 2) Decline Smith press, light

ADVANCED (WEEKS 3-4)

Last set: drop set, -30%, twice.

Block B swap (week 6+): Decline chest press machine

Watch demo >

4B Cable lateral raise

SIDE DELTS | Pair 1 (with 4A)

Set	Reps	Weight
Set 1	12-15	5 kg (11 lb)
Set 2	12-15	5 kg (11 lb)
Set 3	12-15	5 kg (11 lb)
Set 4	12-15, failure	5 kg (11 lb)

Rest: 45 sec, then back to 4A. | No warm-up set

HOW

- Lead with the elbow
- Stop at shoulder height

WHY THIS EXERCISE, WHY HERE

Side delts are your biggest V-taper lever, so they get 4 hard sets.

If busy: 1) Dumbbell lateral raise 2) Lateral raise machine

ADVANCED (WEEKS 3-4)

Last set: drop set, 3 drops.

Block B swap (week 6+): Lean-away single-arm lateral raise

Watch demo >

5A Rope pushdown

TRICEPS | Pair 2 (with 5B)

Set	Reps	Weight
Set 1	10	65 lb (29.5 kg)
Top set	6-8, failure	80 lb (36.3 kg)
Back-off	12	55 lb (24.9 kg)

Rest: 45 sec, then 5B. | No warm-up set

HOW

- Elbows pinned
- Split the rope

WHY THIS EXERCISE, WHY HERE

Triceps are about two-thirds of arm size, and they're already warm from pressing.

If busy: 1) Triceps extension machine 2) Straight-bar pushdown

ADVANCED (WEEKS 3-4)

Back-off set: drop set, -30%.

Block B swap (week 6+): V-bar pushdown

Watch demo >

5B Cable crunch

ABS | Pair 2 (with 5A)

Set	Reps	Weight
Set 1	12-15	25 kg (55 lb)
Set 2	12-15	25 kg (55 lb)
Set 3	12-15, failure	27.5 kg (61 lb)

Rest: 45 sec, then back to 5A. | No warm-up set

HOW

- Round the spine, hips still

WHY THIS EXERCISE, WHY HERE

Loaded abs build thickness so they show when fat drops. Pairs with pushdowns at the same cable station.

If busy: 1) Ab crunch machine 2) Decline crunch

Watch demo >

6 Overhead cable triceps extension

TRICEPS LONG HEAD

Set	Reps	Weight
Set 1	10-12	20 lb (9.1 kg)
Set 2	10-12	20 lb (9.1 kg)
Set 3	10-12, failure	25 lb (11.3 kg)

Rest: 45 sec. | No warm-up set

HOW

- Elbows forward
- Full stretch behind the head

WHY THIS EXERCISE, WHY HERE

The long head is the biggest triceps part and only fully stretches overhead.

If busy: 1) Dumbbell overhead extension 2) Dumbbell overhead extension, light

ADVANCED (WEEKS 3-4)

Last set: rest-pause, 2 rounds.

Block B swap (week 6+): EZ bar skull crusher, light

Watch demo >

Incline treadmill, 12 min

CARDIO | AFTER LIFTING

After the last set.

- Speed 5.0-5.5 km/h (3.1-3.4 mph), incline 10%
- Heart rate 120-140
- **If taken:** 1) bike 12 min 2) stair machine slow 10 min

WHY

Adds burn without hurting recovery.

Cooldown

5 minutes after cardio. Hold each stretch, breathe slowly, no bouncing.

Lat stretch

30 SEC EACH SIDE

Hold a rack at waist height, sit your hips back, feel the side of your back.

Watch demo >

Overhead triceps stretch

30 SEC EACH

Gentle. Stop if the shoulder pinches.

Watch demo >

Doorway chest stretch, gentle

30 SEC EACH

Elbow at shoulder height, small lean only. No deep stretch.

Watch demo >

Neck side stretch
30 SEC EACH

Ear toward shoulder, the other shoulder down.

Watch demo >

Child's pose
45 SEC

Arms forward, breathe slowly. Calms your heart rate down.

Watch demo >

Calories burned today

Estimates for your 97 kg body weight, as ranges.

Part	Calories
Warm-up + cooldown	30-40
Lifting (65 min)	280-380
Incline walk (12 min)	90-120
Total today	**400-540 kcal**

READ THIS

These burns are already counted in your calorie targets. They are not extra food. Your fat loss comes from eating ~2,080 kcal on average. Smartwatches usually overestimate lifting calories by 30-50%, so trust these ranges over the watch.

How a set works

- **Weeks 1-2 (Basic):** do the sets as written. Last set of every exercise ends 1 rep short of failure.
- **Weeks 3-4 (Advanced):** same sets, plus the purple technique on each card on the last set only.
- **Machines and cables:** the last set goes to true failure, the rep you can't finish.
- **Barbell squat, bench, RDL:** always 1 rep short. Never grind these.
- **Progress:** top set hits the top of its range, add 2.5-5 kg next time.
- **Pairs:** do A, then B, then rest, repeat. Rest 60-90 sec unless the card says more.
- **Week 5:** deload: same exercises, 60% weight, half the sets. **Weeks 6-9:** Block B swaps.
