Weights

Weights are starting guesses from your logs. If the first working set leaves 3+ reps spare, go up one plate. Write down what you actually used.

Warm-up

8-10 minutes. Do it every time, even when you are short on time.

Easy bike or treadmill

3 MIN

Light pace, just get warm.
Alternative: Skipping, easy, 2 min

Watch demo >

Neck mobility

5 EACH WAY

Chin tucks, ear-to-shoulder tilts, look left and right. Slow. No full head circles: they grind the neck joints.

Watch demo >

Arm circles

10 EACH WAY

Small to big, forward then back.

Watch demo >

Cat-cow
8 REPS

On hands and knees: round your back up, then let it sag. Slow, breathe with it.

Watch demo >

Shoulder prep (band)

Shoulder rule: no band 'dislocates' (passing a band over your head and behind). That end position is how your shoulder came out.

Band pull-apart
15 REPS

Arms straight at chest height, pull the band to your chest, squeeze the shoulder blades.
If no band: Cable reverse fly, very light

Watch demo >

Band external rotation
12 EACH ARM

Elbow pinned to your side, rotate the forearm out slowly. This is your shoulder's stabiliser work.
If no band: Cable external rotation, very light

Watch demo >

Band face pull
15 REPS

Pull to eye level, thumbs back.
If no band: Cable face pull, light

Watch demo >

Wall scap push-up
10 REPS

Arms straight on a wall, only the shoulder blades move together and apart.
Alternative: Scap push-up on knees

Calories burned today

Estimates for your 97 kg body weight, as ranges.

Part	Calories
Warm-up + cooldown	30-40
Lifting (40 min)	200-300
Incline walk (15 min)	110-150
Total today	**340-490 kcal**

These burns are already counted in your calorie targets. They are not extra food. Your fat loss comes from eating ~2,080 kcal on average. Smartwatches usually overestimate lifting calories by 30-50%, so trust these ranges over the watch.

How a set works

- **Weeks 1-2 (Basic):** do the sets as written. Last set of every exercise ends 1 rep short of failure.
- **Weeks 3-4 (Advanced):** same sets, plus the purple technique on each card on the last set only.
- **Machines and cables:** the last set goes to true failure, the rep you can't finish.
- **Barbell squat, bench, RDL:** always 1 rep short. Never grind these.
- **Progress:** top set hits the top of its range, add 2.5-5 kg next time.
- **Pairs:** do A, then B, then rest, repeat. Rest 60-90 sec unless the card says more.
- **Week 5:** deload: same exercises, 60% weight, half the sets. **Weeks 6-9:** Block B swaps.
