Your new split

Day	Session
Mon	**Push**
Tue	**Pull**
Wed	**Legs** (quads)
Thu	**Upper**
Fri	**Lower** (hinge, glutes)
Sat	Optional: Arms + Delts **or** Cardio + Core
Sun	Rest + check-in

Why this split

Every muscle is hit twice a week. Monday-Wednesday is the heavy PPL. Thursday-Friday is a faster Upper/Lower second hit. Five days in a row is tough, so Saturday is optional and Sunday is always off.

Which Saturday?

- **Option 1, Arms + Delts:** if you feel fresh and want more arm and shoulder growth.
- **Option 2, Cardio + Core:** if you're sore, slept badly, or the scale is slow.

- **Skip it** if you're wrecked. Five good days beat six bad ones.

Swimming dropped

Swimming burned roughly 800-1,100 kcal a week. Extra lifting days and cardio blocks replace most of that, so your food targets stay the same.

Basic vs Advanced

- **Weeks 1-2, Basic:** sets as written. Machines and cables: the last set to true failure. Barbell lifts: 1 rep short.
- **Weeks 3-4, Advanced:** add the purple technique on each card, last set only.
- **Week 5, Deload:** 60% weight, half the sets.
- **Weeks 6-9, Block B:** swap to the 'Block B' exercise on each card.
- **Week 10:** deload, then we review.

The techniques

- **Drop set:** failure, cut weight 30%, keep going.
- **Rest-pause:** failure, 15 sec rest, failure again.
- **Myo-reps:** 15-20 reps, then 15 sec rest, 4-5 reps, repeat 4 times.
- **Lengthened partials:** after failure, half-reps in the stretch.
- **21s:** 7 bottom-half, 7 top-half, 7 full.

Weekly sets

Muscle	Mon-Fri	+ Sat option 1
Chest (upper, middle, lower)	16	16
Back (lats, mid-back)	19	19
Traps	3 + rows	3 + rows
Side delts	10 + press	14 + press
Rear delts	6	9
Biceps	9	15
Triceps	9	15
Forearms	carries	4 + carries
Quads	15	15
Hamstrings	9	9
Glutes (max + medius)	11 + compounds	11 + compounds
Inner thighs	3	3
Calves	7	7
Abs + obliques	9	9 (18 with option 2)

Chest and back are at your 20-set target. Arms and delts reach it only with Saturday option 1, so

pick it whenever you can.

Every muscle, every week

Where each part of your body gets trained. Nothing is left to chance.

Region	Exercises	Day
Upper chest	Smith incline press; incline DB press; low-to-high fly	Mon, Thu
Middle chest	Smith flat bench	Mon
Lower chest	High-to-low cable fly	Mon
Front delts	Incline press, shoulder press	Mon
Side delts	Lateral raises (straight, myo-reps, leg day)	Mon, Thu, Fri, Sat
Rear delts	Rear delt fly, face pull	Tue, Thu, Sat
Upper traps	Dumbbell shrug	Tue
Mid-back, rhomboids	Supported row, close-grip row, single-arm row	Tue, Thu

Region	Exercises	Day
Lats (width)	Wide, neutral and straight-arm pulldowns	Tue, Thu
Lower back	Back extension, RDL	Fri
Biceps long head	Incline DB curl	Tue
Biceps short head	EZ curl, cable curl, preacher	Tue, Thu, Sat
Brachialis, brachioradialis	Hammer curl, reverse curl	Sat
Triceps long head	Overhead extensions	Mon, Sat
Triceps lateral + medial	Pushdowns (rope, straight bar)	Mon, Thu, Sat
Forearms + grip	Wrist curls, farmer carry, hangs	Fri, Sat
Upper abs	Cable crunch	Mon
Lower abs	Hanging knee raise	Tue
Obliques	Cable woodchop	Wed
Deep core	Dead bug, Pallof, plank	Sat opt 2

Region	Exercises	Day
Quads	Squat, leg press, extension, lunge	Wed, Fri
Hamstrings	RDL, leg curls	Wed, Fri
Glutes (big)	Hip thrust, high-feet leg press, lunge	Wed, Fri
Glute medius	Hip abductor	Fri
Inner thighs	Hip adductor	Fri
Calves (gastrocnemius)	Standing calf raise	Wed
Calves (soleus)	Seated calf raise	Fri

Neck: not loaded directly. With your shoulder history it isn't worth the risk, and the shrugs build the visible line.

The honest part: training every region makes you look complete and athletic. What makes you look like a different man on 15 January is mostly the fat coming off, so the food rules and steps matter as much as this list.

Calories burned

Day	Burned
Mon Push	400-540
Tue Pull	410-560
Wed Legs	450-590
Thu Upper	390-530
Fri Lower	440-580
Sat option	300-490
Sun walk	150-200
Week	**~2,550-3,500 kcal**

These burns are already counted in your calorie targets. They are not extra food. Your fat loss comes from eating ~2,080 kcal on average. Smartwatches usually overestimate lifting calories by 30-50%, so trust these ranges over the watch.

Food targets

Day	kcal	Protein	Carbs	Fat
Mon-Fri	2,150	240 g	151 g	65 g
Sat	2,100	240 g	139 g	65 g
Sun	1,750	240 g	51 g	65 g

Hand-portion rules

Per meal	Portion
Protein	2 palms
Carbs	1 cupped hand (2 after training, 0 at Sunday dinner)
Veg	2 fists
Fat	1 thumb

Leak-stoppers

- Oil measured: 1 tbsp per dish per person.
- Chai: no sugar, max 2 cups.
- Outside lunch: grilled, 1 roti, no fried, no cold drinks.
- Kebabs at night: 4 max, 1 chapati.
- Weekends: same rules.
- 7-day weight average. No drop of 0.5 kg in 2 weeks: remove the dinner carbs.

Supplements

- **Whey:** 1-2 scoops a day to reach 240 g protein.
- **Total War:** fine on training days, by 7 pm.
- **Lipo 6: no.** 200 mg caffeine plus yohimbine and synephrine. On top of Total War, oral minoxidil, your palpitations history and rising ALT, the risk outweighs a 50-100 kcal benefit. Ask your doctor with the label if your trainer insists.
- **Creatine 5 g:** reasonable, just say the word.

Forecast

	4 weeks	8 weeks
Weight	~93-94 kg	~90-91 kg
Waist	-3 to -4 cm	-6 to -8 cm
Strength	+10-15%	+20-30%
Abs	Not yet	Faint outline at best
