Tuesday

Pull

Back, rear delts, biceps.

Session map

Order	Exercise
Warm-up	8-10 min
1	Wide pulldown
2	Supported row
3	Close-grip row
4A+4B	Straight-arm + Rear delt
5A+5B	EZ curl + Knee raise
6	Incline curl
7	Shrug
Cardio	Bike intervals 12 min
Cooldown	5 min stretches

About 80-90 min in total. You burn roughly **410-560 kcal** today.

Food today	
Calories	2,150 kcal
Protein	240 g
Carbs	151 g

Food today	
Fat	65 g

Meal 60-90 min before. Total War about 45 min before (by 7 pm, or half a scoop if you sleep badly). No Lipo 6 on top. Shake right after training.

Weights

Weights are starting guesses from your logs. If the first working set leaves 3+ reps spare, go up one plate. Write down what you actually used.

Warm-up

8-10 minutes. Do it every time, even when you are short on time.

Easy bike or treadmill

3 MIN

Light pace, just get warm.
Alternative: Skipping, easy, 2 min

Watch demo >

Neck mobility

5 EACH WAY

Chin tucks, ear-to-shoulder tilts, look left and right. Slow. No full head circles: they grind the neck joints.

Watch demo >

Arm circles

10 EACH WAY

Small to big, forward then back.

Watch demo >

Cat-cow
8 REPS

On hands and knees: round your back up, then let it sag. Slow, breathe with it.

Watch demo >

Shoulder prep (band)

Shoulder rule: no band 'dislocates' (passing a band over your head and behind). That end position is how your shoulder came out.

Band pull-apart
15 REPS

Arms straight at chest height, pull the band to your chest, squeeze the shoulder blades.
If no band: Cable reverse fly, very light

Watch demo >

Band external rotation
12 EACH ARM

Elbow pinned to your side, rotate the forearm out slowly. This is your shoulder's stabiliser work.
If no band: Cable external rotation, very light

Watch demo >

Band face pull
15 REPS

Pull to eye level, thumbs back.
If no band: Cable face pull, light

Watch demo >

Wall scap push-up
10 REPS

Arms straight on a wall, only the shoulder blades move together and apart.
Alternative: Scap push-up on knees

Watch demo >

Main workout

1 Lat pulldown, wide grip

LATS (WIDTH)

Set	Reps	Weight
Set 1	10	50 kg (110 lb)
Set 2	8	55 kg (121 lb)
Top set	6-8, failure	60 kg (132 lb)
Back-off	12	45 kg (99 lb)

Rest: 2 min. | No warm-up set

HOW

- Pull to upper chest, never behind the neck
- Elbows drive down

WHY THIS EXERCISE, WHY HERE

Lat width is the V in V-taper. First on Pull day so it gets the heaviest work.

If busy: 1) Assisted pull-up machine 2) Assisted pull-up, wide grip

ADVANCED (WEEKS 3-4)

Back-off set: after failure, do 5 half-reps from the top (lengthened partials).

Block B swap (week 6+): Wide-grip pull-up or assisted pull-up

First exercise: one ramp set at 50%.

Watch demo >

2 Chest-supported row machine

MID-BACK, REAR DELTS

Set	Reps	Weight
Set 1	10	40 kg (88 lb)
Top set	6-8, failure	47.5 kg (105 lb)
Back-off	12	35 kg (77 lb)

Rest: 2 min. | No warm-up set

HOW

- Chest on the pad
- Drive elbows back
- Squeeze 1 sec

WHY THIS EXERCISE, WHY HERE

Back thickness. The pad lets you go to failure without loading your lower back, which you need fresh for tomorrow's legs.

If busy: 1) Seated cable row 2) Seated cable row, wide grip

ADVANCED (WEEKS 3-4)

Back-off set: 1-sec squeeze plus a drop set (-30%).

Block B swap (week 6+): T-bar row

Watch demo >

3 Seated cable row, close grip

MID-BACK, LOWER LATS

Set	Reps	Weight
Set 1	10-12	45 kg (99 lb)
Set 2	10-12	45 kg (99 lb)
Set 3	10-12, failure	45 kg (99 lb)

Rest: 75 sec. | No warm-up set

HOW

- Chest up
- Elbows past your body

WHY THIS EXERCISE, WHY HERE

A third back angle for total thickness.

If busy: 1) Single-arm dumbbell row 2) Machine row, neutral grip

ADVANCED (WEEKS 3-4)

Last set: myo-reps: 12-15, then 15 sec rest, then 3-5 reps, x4.

Block B swap (week 6+): Single-arm machine row

Watch demo >

4A Straight-arm cable pulldown

LATS (ISOLATION) | Pair 1 (with 4B)

Set	Reps	Weight
Set 1	12-15	20 kg (44 lb)
Set 2	12-15	22.5 kg (50 lb)
Set 3	12-15, failure	22.5 kg (50 lb)

Rest: 45 sec, then 4B. | No warm-up set

HOW

- Arms almost straight
- Bar to thighs

WHY THIS EXERCISE, WHY HERE

A lat pump with no biceps fatigue.

If busy: 1) Dumbbell pullover 2) Dumbbell pullover, light

ADVANCED (WEEKS 3-4)

Last set: rest-pause: failure, 15 sec rest, failure again, twice.

Block B swap (week 6+): Dumbbell pullover

Watch demo >

4B Rear delt fly machine

REAR DELTS | Pair 1 (with 4A)

Set	Reps	Weight
Set 1	15	15 kg (33 lb)
Set 2	15	15 kg (33 lb)
Set 3	15, failure	17.5 kg (39 lb)

Rest: 45 sec, then back to 4A. | No warm-up set

HOW

- Arms slightly bent
- Squeeze the back of the shoulder

WHY THIS EXERCISE, WHY HERE

Rounds the shoulder from behind and protects the joint.

If busy: 1) Cable reverse fly 2) Band pull-apart, 3 x 20

ADVANCED (WEEKS 3-4)

Last set: 10 full reps, then partials to failure.

Block B swap (week 6+): Reverse cable fly

Watch demo >

5A EZ bar curl

BICEPS | Pair 2 (with 5B)

Set	Reps	Weight
Set 1	10	20 kg (44 lb)
Top set	6-8, failure	27.5 kg (61 lb)
Back-off	12	17.5 kg (39 lb)

Rest: 60 sec, then 5B. | No warm-up set

HOW

- Elbows still
- 3 sec lowering

WHY THIS EXERCISE, WHY HERE

Heavy biceps work, already warm from all the pulling.

If busy: 1) Straight-bar cable curl 2) Dumbbell curl, alternating

ADVANCED (WEEKS 3-4)

Back-off set: 3-sec lowering every rep.

Block B swap (week 6+): Barbell curl

Watch demo >

5B Hanging knee raise

LOWER ABS, GRIP | Pair 2 (with 5A)

Set	Reps	Weight
Set 1	12-15	Bodyweight
Set 2	12-15	Bodyweight
Set 3	Max	Bodyweight

Rest: 60 sec, then back to 5A. | No warm-up set

HOW

- No swinging
- Curl the pelvis up

WHY THIS EXERCISE, WHY HERE

Lower abs plus a spine decompression after rows.

If busy: 1) Lying leg raise 2) Captain's chair knee raise

Watch demo >

6 Incline dumbbell curl

BICEPS LONG HEAD

Set	Reps	Weight
Set 1	10-12	8 kg (17.6 lb) each
Set 2	10-12	8 kg (17.6 lb) each
Set 3	10-12, failure	8 kg (17.6 lb) each

Rest: 45 sec. | No warm-up set

HOW

- Arms hang straight down

WHY THIS EXERCISE, WHY HERE

A stretched biceps grows more. This builds the peak.

If busy: 1) Preacher curl machine 2) Bayesian cable curl

ADVANCED (WEEKS 3-4)

Last set: mechanical drop: incline curl to failure, then sit up and keep curling.

Block B swap (week 6+): Bayesian cable curl

Watch demo >

7 Dumbbell shrug

UPPER TRAPS

Set	Reps	Weight
Set 1	12-15	20 kg (44 lb) each
Set 2	12-15	22.5 kg (50 lb) each
Set 3	12-15, failure	22.5 kg (50 lb) each

Rest: 60 sec. | No warm-up set

HOW

- Arms straight, shoulders straight up to ears
- Pause 1 sec, lower slowly
- No rolling the shoulders

WHY THIS EXERCISE, WHY HERE

Traps fill the line between neck and shoulders. A thicker upper trap makes the shoulders look broader in a T-shirt, and rows and pulldowns don't train them fully.

If busy: 1) Smith machine shrug 2) Cable shrug

ADVANCED (WEEKS 3-4)

Last set: 2-second hold at the top of every rep.

Block B swap (week 6+): Barbell shrug

Watch demo >

Bike intervals, 12 min

CARDIO | AFTER LIFTING

After the last set.

- 2 min easy, 8 rounds of 30 sec hard / 30 sec easy, 2 min easy
- **If taken:** 1) rower same intervals 2) incline walk 12 min

WHY

Intervals make you sweat and burn more in less time.

Cooldown

5 minutes after cardio. Hold each stretch, breathe slowly, no bouncing.

Lat stretch

30 SEC EACH SIDE

Hold a rack at waist height, sit your hips back, feel the side of your back.

Watch demo >

Overhead triceps stretch

30 SEC EACH

Gentle. Stop if the shoulder pinches.

Watch demo >

Doorway chest stretch, gentle

30 SEC EACH

Elbow at shoulder height, small lean only. No deep stretch.

Watch demo >

Neck side stretch
30 SEC EACH

Ear toward shoulder, the other shoulder down.

Watch demo >

Child's pose
45 SEC

Arms forward, breathe slowly. Calms your heart rate down.

Watch demo >

Calories burned today

Estimates for your 97 kg body weight, as ranges.

Part	Calories
Warm-up + cooldown	30-40
Lifting (65 min)	280-380
Bike intervals (12 min)	100-140
Total today	**410-560 kcal**

READ THIS

These burns are already counted in your calorie targets. They are not extra food. Your fat loss comes from eating ~2,080 kcal on average. Smartwatches usually overestimate lifting calories by 30-50%, so trust these ranges over the watch.

How a set works

- **Weeks 1-2 (Basic):** do the sets as written. Last set of every exercise ends 1 rep short of failure.
- **Weeks 3-4 (Advanced):** same sets, plus the purple technique on each card on the last set only.
- **Machines and cables:** the last set goes to true failure, the rep you can't finish.
- **Barbell squat, bench, RDL:** always 1 rep short. Never grind these.
- **Progress:** top set hits the top of its range, add 2.5-5 kg next time.
- **Pairs:** do A, then B, then rest, repeat. Rest 60-90 sec unless the card says more.
- **Week 5:** deload: same exercises, 60% weight, half the sets. **Weeks 6-9:** Block B swaps.
