If you're behind

Behind by	Do this
0-0.5 kg	Nothing. Normal noise. Keep going.
0.5-1 kg	+2,000 steps a day this week.
Over 1 kg	+2,000 steps AND remove breakfast carbs. Pick Saturday option 2.
Over 1 kg two weeks running	Check the leaks in file 4 (plateau card). Message me.

If you're ahead by more than 1 kg and your lifts are dropping or you feel dizzy, add one cupped hand of carbs on training days. Losing muscle isn't the goal.

Floors: never under 240 g protein, never under ~1,800 kcal on training days.

Week 1 | Foundation

3-8 Nov

Target 7-day avg	Days left on Sunday
95.7 kg	68

Mission

THIS WEEK'S ONE EXTRA THING

- Weigh every day. 8k steps. No dinner carbs from night 1.

Day 1 to day 6. Nobody gets lean in a week, but everybody who gets lean starts with one.

Notes

Expect a fast drop, 1-2 kg, mostly water. Enjoy it, don't trust it. Training starts with Push on Tuesday.
